Multiple file support Batch conversion support Hot directories support Multiple files support Batch conversion support Hot directories support File import/export support Quality configuration Log file support ALSA and Pulseaudio support Libraries Included: gtk+2, glib-2, gst-0.10, gst-plugins-base-0.10 GTK integration and sound support GUI based configuration Description: File converter with GUI and multiple file support that supports hot directories. The default GUI has a Window that lists all the currently converted files, as well as its original path and size. The other available window shows additional details about a file that the user has selected in the List Window. It offers different quality options for WAV and MP3 files and also a tab-based search in different formats. The conversion process is started with the hot-directories function, which takes care of the directories automatically. If you use the hot-directories function, you won't be able to use the default GUI to select files. The application uses GTK+ as a user interface toolkit. This allows you to use it on the Linux and Windows platforms. Description: A simple, and easy-to-use application that allows you to convert multiple files to WAV at the same time. This is especially useful for backing up files to MP3 and WMA formats. The application supports hot-directories, as well as multiple files. It automatically converts all files that have been dragged over it. The program can also run as a daemon, which means it can be used to run conversion jobs in the background. This is especially useful when you want to convert files without the user's interference. Supported formats: WAV MP3 WMA M4A MP2 The application uses GTK+ as a user interface toolkit. This allows you to use it on the Linux and Windows platforms. Description: Pulseaudio library for Linux Pulseaudio is a sound server that provides services for sound capture and output, and also provides the necessary abstraction layer for sharing a single sound card. Pulseaudio makes it easier for applications to use multiple audio devices simultaneously. Using a sound server allows multiple applications to share the sound card. This is useful in cases where using an application directly with only one card is not enough. Pulseaudio has a simple API. The library was 2edc1e01e8

Analyses of the influence of chronic kidney disease (CKD) on hospitalization, readmission, and mortality after total knee arthroplasty (TKA) are few and contradictory. The aim of this study was to evaluate the impact of CKD on readmission and life expectancy after primary TKA. A cohort of 691 patients operated on between 2008 and 2013 was retrospectively reviewed. We analyzed a total of 140 patients with CKD and 551 without. The two groups were comparable for age, gender, American Society of Anesthesiologists score, comorbidities, preoperative Oxford Knee Score, and preoperative University of California, Los Angeles activity score. Mean follow-up was 54.1 months. CKD was associated with hospitalization (36.8 ± 17.7 vs 18.2 ± 11.2 days, P
