Thinkwill Mw100 24

thinkwill mw100 sm pc [26] thinkwill mw100 sm [27] [28] Thinking is a multinational corporation that produces a variety of products, including desktops, laptops, tablets and smartphones. The company was founded in 1985 and is headquartered in Washington, D.C. Thinkpad, a line of laptop computers from IBM, is named after the Think Pascal, a series of personal computers that was developed and marketed by the company., which sold over 10.5 million tablets in Q4 2012. Before the introduction of the ThinkPad X series and the Lenovo IdeaPad, the laptops of IBM were known as the ThinkPad, reflecting the company`s origins as "Think". The name "ThinkPad" was first introduced in 1996 with the ThinkPad 300. It was based on the IBM ThinkCentre line of desktop workstations

and was intended to evoke the aura of a "Zen Master". The official name was not announced until the introduction of the ThinkPad 700 in 2002, with the ThinkPad T series. The product was initially marketed as the "IBM ThinkPad T41", the first model to feature a 14-inch display. In January 2002, IBM released the ThinkPad T42, which featured a larger 13.3-inch display. The ThinkPad brand was expanded in 2004 with the introduction of the ThinkPad E series, as well as the ThinkCentre M and ThinkCentre H series. In 2005, the company released the ThinkPad X series, which included laptops with very long battery life. A notebook with an extended battery life was introduced in October 2005 with the ThinkPad X30. The ThinkPad X series of notebooks were replaced in April 2006 with the ThinkPad T series, which included the first ThinkPad with Intel Atom processors, the ThinkPad X100e. After the introduction of the

ThinkPad X series, the products were no longer marketed as IBM ThinkPads, but as Lenovo ThinkPads. A separate product line, the ThinkPad E430, was introduced in January 2008. The "ThinkPad" name, or at least some variation of it, is used for tablets
